

Stock Strategy Brief — 17 Jun 2026

Information, not financial advice. Short-term moves are close to a coin flip — these are researched, sourced views with the key risks spelled out, not guarantees. Prices are intraday snapshots from the dates noted.

1. State Bank of India (SBIN, NSE) — Accumulate on dips

View: Large, cheap PSU bank (~₹1,004 on 10 Jun), ~19% below its 52-week high. Jefferies rates it **Buy**, **target ₹1,300** (~30% upside) on corporate-loan repricing, improving deposit productivity and strong fee income.

Recent: 71st AGM on 18 Jun 2026; board cleared a plan to raise up to **\$2bn** overseas in FY27.

Risk: Broker consensus is genuinely mixed (some 'Sell'); the fundraise could dilute; PSU-bank cyclicality.

2. REC Limited (RECLTD, NSE) — Hold / event-driven (don't chase)

View: Power-sector financier (~₹348 on 12 Jun) with a ~5% dividend yield. The dominant factor is the **reported merger of REC into PFC** (Ministry of Power approval 10 Jun 2026, pending further sign-off) - wait for the share-swap terms before acting.

Recent: Q4 net profit -21.7% YoY; final dividend ₹1.55/sh. Targets split (~₹380-464).

Risk: Merger terms/uncertainty; falling profit; interest-rate sensitivity.

3. ITC (ITC, NSE) — Hold (defensive / income)

View: Steady FMCG-led compounder. FY26 revenue **₹89,258 Cr (+10.3%)**, PAT **₹21,018 Cr (+4.9%)**; FMCG strong (rev +15%, EBIT +51%) but cigarette optics weak (net sales -24% YoY on a transition, EBIT still +7%). Reliable **₹8/sh** FY26 dividend.

Recent: Dipped ~2% after Q4 (22 May). Targets divided - Citi ₹290 to CLSA ₹394; ICICI Sec 'Add' ₹350, Elara 'Accumulate' ₹335.

Risk: Cigarette volume/tax overhang; limited near-term upside. Good for stability and income, not momentum.

4. JSW Infrastructure (JSWINFRA, NSE) — Buy / Accumulate (growth)

View: ~₹294.5 (16 Jun); India's #2 port operator, expanding fast. Q4FY26 revenue **+19% YoY**, EBITDA +20% (net profit -17.8% YoY). **Motilal Oswal 'Buy' ₹360** (8 Jun); 6-broker average ~₹360 (~22% upside).

Recent: Won a 30-year **Kolkata NSD container terminal** (9 Jun, +0.93m TEU capacity).

Risk: Profit/margin dip this quarter; rich valuation; promoter-group concentration.

Sources: [Business Standard](#) · [Trendlyne](#)

5. Dixon Technologies (DIXON, NSE) — Watch / high-risk (buy only on weakness)

View: ~₹11,546 (12 Jun), down ~37% from its 52-week high (₹18,471) - India's largest electronics-manufacturing (EMS) play. But Q4FY26 net profit **-35.9%** (revenue only +2.1%) disappointed. Long-term broker 'Buy' (target ~₹17,500); fair-value estimate ~₹11,800, about the current price.

Recent: Continued investor roadshows (e.g. Principal Global, 1 Jun).

Risk: Very high valuation, client/margin concentration, volatile - earnings need to re-accelerate to justify the price.

Sources: [Business Standard](#) · [INDmoney](#)

6. Reliance Industries (RELIANCE, NSE) — Buy / Accumulate (catalyst-rich)

View: ~₹1,272 (10 Jun) with multiple near-term triggers - the **Jio Platforms IPO** (~\$4bn; the 19 Jun AGM is officially labelled 'post-IPO'), a **Meta AI data-centre** deal (168 MW at Jamnagar, 10 Jun), and retail (Shein app relaunch). **YES Securities 'Buy' ₹1,651** (~25% upside); ~₹1,400 seen near-term.

Recent: +6% in three sessions into the AGM.

Risk: Classic 'buy the rumour, sell the news' around the 19 Jun AGM; high expectations already priced; execution on new bets.
